Course Key Facts

Duration: 4 + 1 days

Location: To be agreed

Price: Includes comprehensive course notes, IOSH Assessment & Certificate

Course Overview

A basic qualification in safety and health for managers and supervisors in all organisations. The aim of the course is to “ensure that safety requirements are appreciated by people employed as line managers and enable them to review their own departmental systems for safety, introducing new controls or implementing changes as appropriate to make their workplace safer”.

Who the Course is For

Managing Safely is for non-health & safety expert personnel who have to manage risk & resources.

Learning Outcomes

After successfully completing the course the manager will be better able to:

- Apply basic management principles and practices to safety and health issues as part of a total management strategy.
- Set achievable safety and health objectives and plan and implement courses of action to achieve those objectives.
- Recognise safety and health hazards present in the workplace.
- Carry out and record basic assessments of the risks associated with workplace hazards, and recommend suitable control measures.
- Take account of risks arising from ergonomic factors.
- Ensure that adequate information, training and supervision is provided for employees.
- Investigate an accident or incident involving injury or damage to determine the causes and take appropriate actions.

Follow on Training

NEBOSH International General Certificate

Certification

On successful completion of a short answer test & a practical assessment in the workplace the delegate will receive an IOSH accredited certificate.

Dönüşen Adam delegate's thoughts on an IOSH Managing Safely course

“Interesting course, learned very new subjects, not got bored throughout the course. Excellent!”
